

Minimum system requirements

- Node.js version 20 and above.

Note: If you experience problems with versions above Node.js v20, please revert to version v20.

Installation

Follow these steps to get your project up and running locally:

1. Install dependencies

```
npm install  
or  
yarn install  
or  
pnpm install
```

If you encounter any problems installing packages, try adding the `--legacy-peer-deps` or `--force` flag:

```
npm install --legacy-peer-deps
```

2. Run the development server

```
npm run dev  
or  
yarn dev  
or  
pnpm dev
```

3. Open the project

Open <http://localhost:3000> in your browser to view the result.

4. Edit the project

To edit the project, explore the files under the **app** folder and **components** folder.
